dear sir/madami could not believe that i could not chose the broadcast of my choose. when i first learned about xm i was trilled. i enrolled because of th broad chooses of programming and informative stations that my whole family could enjoy. we do not agree to let national broadcasters dictate our preferences with regard to xm since we are paying for the use of. one of the most inportatant features the weather and traffic is very useful since we are able to travel feeling safer and more confident in knowing what to expect. hope that are rights are not taken away because of the national association of broadcasters agenda.
